

COVID-19 SITUATION REPORT

WEEKLY EPIDEMIOLOGICAL REPORT 64

Epi Week 52: 27th December 2021 – 2nd January 2022

DATA AS REPORTED AND ACCURATE BY NCDC AS AT MIDNIGHT 2ND JANUARY 2022

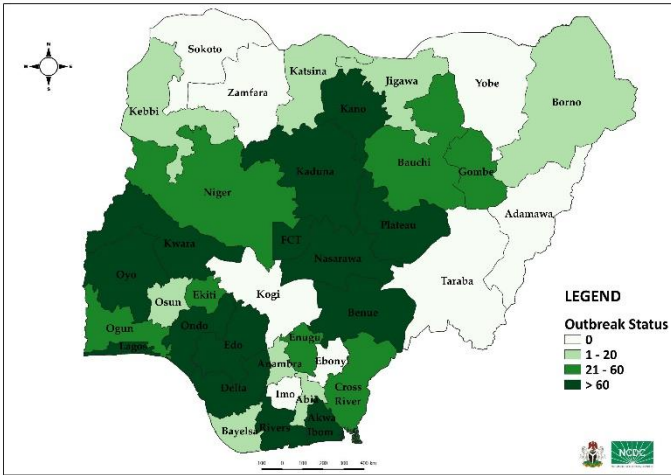

Fig 1. Distribution of cases (Epi Week 52 only)

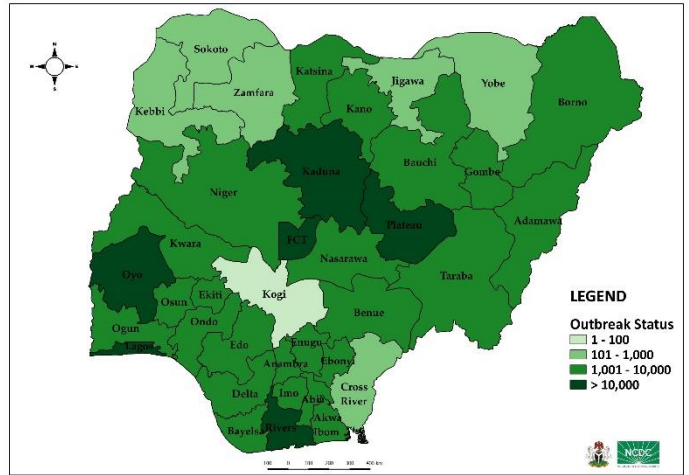

Fig 2. Distribution of cumulative cases

HIGHLIGHTS

- In Week 52, the number of samples tested decreased to **56,788** from **58,288** reported in week 51. These were reported in **36** states and FCT (Tables 1).
- In Week 52, the number of new confirmed cases decreased to **5,889 (10.4%)** from **13,674 (23.5%)** reported in week 51. These were reported in **28** states and FCT (Tables 1 & 2) and includes backlog of confirmed cases reported from Delta (191), Plateau (26) and Rivers (321).
- In Week 52, the number of discharged cases increased to **2,802** from **1,013** in week 51.
- There were **17** deaths reported in the last one week (Tables 1 & 4). This includes backlogs of deaths reported from Borno State (6)
- Cumulatively, since the outbreak began in Week 9, 2020 there have been **243,450** cases and **3,039** deaths reported with a case fatality rate (CFR) of **1.2%** (Tables 1 & 4).
- In Week 52, the number of in-bound international travellers tested was **9,226** of which **545 (5.9%)** were positive compared to **668 (7.1%)** (out of **9,398** tested) in week 51.
- In Week 52, the number of out-bound international travellers tested was **13,124** of which **1,529 (11.7%)** were positive compared to **1,864 (18.2%)** (out of **10,233** tested) in week 51.
- Worldwide, there has been **281,808,270** confirmed COVID-19 cases with **5,411,759** deaths resulting in a case fatality rate of **1.9%**.

GENERAL FACT SHEET – DATA AS AT 2ND JANUARY 2022

IN FOCUS: Safe School Resumption

The detection of the Omicron variant which has been found to be more transmissible, has intensified the need to ensure the implementation and adherence to public health measures against COVID-19. The SARS-CoV-2 virus and its variants spread easily when people gather and/or come in close contact with one another. Therefore, as schools prepare to reopen amidst a fourth wave of the COVID-19 outbreak in Nigeria, the Nigeria Centre for Disease Control (NCDC) strongly urges schools to take adequate precautions to prevent a surge in the number of students and staff infected.

School administrators should ensure the following to reduce the risk of COVID-19 transmission within schools:

1. Daily temperature checks at points of entry. Those with a temperature above 38°C should not be allowed entry
2. Provision of handwashing facilities and hand sanitizers for hand hygiene
3. Masks must be worn by all those over the age of 6 years on school premises
4. Always ensure proper ventilation and minimum of one metre sitting distance between students in classrooms
5. Surfaces including desks, door handles etc. should be disinfected at least twice; at break time and at the end of the school day
6. Avoid sharing of items such as pencils, biros, erasers, rulers, textbooks, etc.
7. Staff at sick bay should be trained and provided with required Personal Protective Equipment (PPE)
8. Students and staff who feel ill should remain at home and seek treatment at a health facility immediately
9. All eligible persons should get vaccinated against COVID-19 at one of the nearby vaccination sites. Those who are vaccinated must still adhere to public health measures

Additionally, NCDC recommends the use of approved rapid diagnostic test kits in secondary school hostels and university campuses for testing of student and staff upon school resumption and for those experiencing symptoms of COVID-19 during the school session. Guidelines and instructional materials for schools can be accessed via https://covid19.ncdc.gov.ng/media/files/Public_Health_Guidance_on_Safe_School_Re-opening_in_Nigeria.pdf

We urge States to enhance risk communication and community engagement activities to spread awareness on COVID-19, the Omicron variant and vaccination during this school resumption period. We all have a part to play in managing the outbreak to protect the health of Nigerians.

RESPONSE

On 28th February 2020, a multi-sectoral Emergency Operations Centre (EOC) was activated at Level 3 which is the highest emergency level in Nigeria. This is led by NCDC in close coordination with the State Public Health EOCs (PHEOC) and through the deployment of 61 Rapid Response Teams (RRT) to states. Currently, response activities include:

COORDINATION

- Developed plans for the fourth wave
- Ongoing engagement with high burden states on response to the fourth wave
- Continued engagement with states to ensure regular reporting and response continuity
- Continued roll out of antigen based rapid diagnostic test (Ag-RDT) kits in collaboration with partners

- Continued tracking and collation of data from states for strategic coordination

RESEARCH

- Ongoing COVID-19 vaccine effectiveness study in collaboration with National Primary Health Care Development Agency (NPHCDA) and the World Health Organisation (WHO)
- Ongoing data collection on COVID-19 vaccine hesitancy study
- Continued collation of reports on COVID-19 clinical management study

CASE MANAGEMENT – Led by Department of Hospital Services, Federal Ministry of Health

- Ongoing training of Biomedical Engineers on repair and maintenance of Oxygen equipment in collaboration with Clinton Health Access Initiative (CHAI)
- Conducted case management training on Home Base Isolation Care in South-South and South-East Zones

EPIDEMIOLOGY/SURVEILLANCE AND POINT OF ENTRY

- **Concluded supportive supervision for trained contact tracers in Akwa Ibom, Kaduna, Kano, and Oyo states**
- **Ongoing case finding and contact tracing in 15 states**
- Ongoing training of Port Health Services (PHS) staff on handling of VIPs, diplomats, cranks etc with support from WHO, Ministry of Foreign Affairs (MFA) and ProHealth International (PHI) in all international airports.
- Continued follow up with states for daily reporting, contact tracing and key challenges
- Ongoing enhanced surveillance at points of entry

INFECTION PREVENTION AND CONTROL (IPC)

- **Conducted review of Infection Prevention & Control Assessment Framework (IPCAF) tool for targeted intervention in high burden health facilities**
- **Continue follow up with University College Hospital (UCH), Ibadan and FCT on infection rise in the respective health facilities**
- **Ongoing dissemination of key messaging to focal persons across all States on 4th wave presence and issues regarding intervention prioritisation**
- Conducted refresher trainings and compliance monitoring across NYSC camps in the country
- Ongoing support for the implementation of Hand Hygiene practices and mentoring in Edo, Ebonyi, Ondo states and the FCT Secondary Health facilities
