

Lassa fever Situation Report

Epi Week 44: 31 October – 6 November 2022

Key Points

Table 1: Summary of current week (44), cumulative from Epi week 1–44, 2022 and comparison with previous year (2021)

Reporting Period	Suspected cases	Confirmed cases	Probable cases	Deaths (Confirmed cases)	Case Fatality Ratio (CFR)	States and LGAs affected (Confirmed cases)
Current week (week 44)	110	17	0	0	0.0%	State(s): 5 LGA(s): 10
2022 Cumulative (week 44)	7293	975	37	177	18.2%	State(s): 26 LGA(s): 106
2021 Cumulative (week 44)	3567	410	3	89	21.7%	State(s): 15 LGA(s): 61

Highlights

- In week 44, the number of new confirmed cases increased from 10 in week 43, 2022 to 17 cases. These were reported from Ondo, Edo, Benue, Kogi and Oyo States (Table 3)
- Cumulatively from week 1 to week 44, 2022, 177 deaths have been reported with a case fatality rate (CFR) of 18.2% which is lower than the CFR for the same period in 2021 (21.7%)
- In total for 2022, 26 States have recorded at least one confirmed case across 106 Local Government Areas (Figures 2 and 3)
- Of all confirmed cases, 71% are from Ondo (33%), Edo (25%), and Bauchi (13%) States.
- The predominant age group affected is 21-30 years (Range: 0 to 90 years, Median Age: 30 years). The male-to-female ratio for confirmed cases is 1:0.8 (Figure 4)
- The number of suspected cases has increased compared to that reported for the same period in 2021
- No new Healthcare worker was affected in the reporting week 44
- National Lassa fever multi-partner, multi-sectoral Technical Working Group (TWG) continues to coordinate the response activities at all levels

Table 2: Key indicators for current week 2022 and trend compared to previous week, Nigeria

Symptomatic contacts	Number for current week	Trend from previous week	Cumulative number for 2022
Probable cases	0	↔	37
Health Care Worker affected	0	↔	55
Cases managed at the treatment centres	17	↑	894
Contact tracing			
Cumulative contact listed	0	↔	3467
Contacts under follow up	13	↓	13
Contacts completed follow up	0	↓	3394
Symptomatic contacts	0	↔	101
Positive contacts	0	↔	49
Contacts lost to follow up	0	↔	11

Key

- ↑ Increase
- ↓ Decrease
- ↔ No difference

Table 3. Weekly and Cumulative number of suspected and confirmed cases for 2022

States	Current week: (Week 44)					Cumulative (Week 1 - 44)				
	Cases				Deaths (Confirmed Cases)	Cases				Deaths (Confirmed Cases)
	Suspected	Confirmed	Trend	Probable HCW*		Suspected	Confirmed	Probable HCW*	(Confirmed Cases)	
1 Ondo	37	9	▲			1489	323	11		54
2 Edo	64	5	▼			2854	252	3		29
3 Bauchi						860	122	26		12
4 Kogi	2	1	▲			138	49			9
5 Ebonyi						265	42	1	3	19
6 Benue	1	1	▲			274	36	2	3	8
7 Taraba						98	34	3	1	15
8 Gombe						249	24	8	2	8

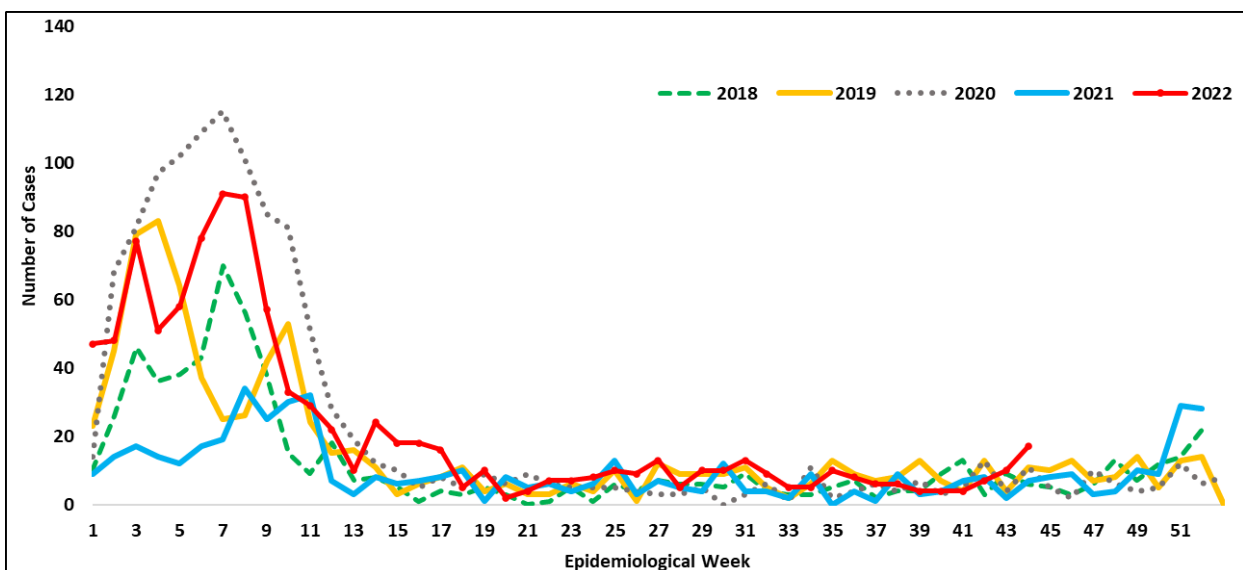

Figure 6: Trend of confirmed cases by epidemiological week, 2018– 2022, Nigeria

Response activities

- Collaborated with World Health Organization (WHO), Coalition for Epidemic Preparedness Innovation (CEPI), and Africa Centre for Disease Control (ACDC) in a workshop towards accelerating the licensure of Lassa fever Vaccines
- Implementation of Nigeria Lassa fever epidemiological Study supported by CEPI
- Implementation of human centred design risk communication activities in most affected States
- Supported Federal Ministry of Health and Irrua Specialist Teaching Hospital Edo State on training of health care workers for clinical management of Lassa fever
- Conducted sub-national Lassa fever surveillance and response intensive workshop
- Deployed of National Rapid Respond Teams (NRRT) to Nasarawa, FCT, Edo, Ondo, Bauchi, Ebonyi, Oyo, Taraba, and Benue to support the response to Lassa fever during the emergency phase
- Supported Lassa fever treatment centre with the engagement of adhoc data clerks to upload case management data on SORMAS
- Continuous distribution of medical response commodities to states and treatment centres across Nigeria
- Risk communications and community engagement activities have been scaled up across states using television, radio, print, social media, and other strategies
- Implementation of Lassa fever environmental response campaign in high burden states by Federal Ministry of Environment
- State Public Health Emergency Operations Centre activated in affected States
- The Eight Lassa fever molecular laboratories in the NCDC network are working full capacity to ensure that all samples are tested, and results provided within the shortest turnaround time
- Confirmed cases are treated at designated treatment centres across the states
- Dissemination of reviewed case management and safe burial practices guidelines
- Dissemination of reviewed Infection Prevention and Control (IPC) guideline and health facility IPC advisory
- The 2022 National Emergency Operations Centre response mode was activated in January 2022 and de-escalated in May 2022
- Lassa fever TWG continues to provide effective multi-sectoral, multi-disciplinary coordination of Lassa fever response
- Lassa fever preparedness assessment carried out for 36 States and FCT at the onset of the outbreak
- Lassa fever alert letters sent to States at the onset of outbreak towards preparedness for the outbreak

Notes on this report

Data Source

Information for this disease was case based data retrieved from the National Lassa fever Emergency Operations Centre.

Case definitions

- **Suspected case:** any individual presenting with one or more of the following: malaise, fever, headache, sore throat, cough, nausea, vomiting, diarrhoea, myalgia, chest pain, hearing loss and either a. History of contact with excreta or urine of rodents b. History of contact with a probable or confirmed Lassa fever case within a period of 21 days of onset of symptoms OR Any person with inexplicable bleeding/hemorrhagia.
- **Confirmed case:** any suspected case with laboratory confirmation (positive IgM antibody, PCR or virus isolation)
- **Probable case:** any suspected case (see definition above) who died or absconded without collection of specimen for laboratory testing
- **Contact:** Anyone who has been exposed to an infected person, or to an infected person's secretions, excretions, or tissues within three weeks of last contact with a confirmed or probable case of Lassa fever

Calculations

- Case Fatality Rate (CFR) for this disease is reported for confirmed cases only
